B.P. Awasthi
Executive Director Track(P)

अ.शा./D.O. No.2016/Track-I(P)/5/10 दिनांक/Date:11.07.2019

Dear Shri Kumar,

विषय/Sub: Estimated requirement of New Rails for Indian Railways in the next 10 years (2019-20 to 2028-29).

In reference to your meeting with CRB and ME on 17.06.2019 in Rail Bhawan, the tentative requirement of new rails for the next 10 years, i.e. from 2019-20 to 2028-29, is as under:

Year	Rail Requirement (Lakh MT)	Year	Rail Requirement (Lakh MT)
2019-20	16.9	2024-25	19.4
2020-21	17.3	2025-26	19.8
2021-22	17.6	2026-27	21.0
2022-23	18.0	2027-28	21.5
2023-24	19.0	2028-29	22.0

2. Out of the above, approximately 1.0 lakh MT will be 52kg/90UTS for next 2 to 3 years. Remaining is of 60kg profile as per IRS:T-12/2009 (as amended). For 60kg profile IR needs 1175HT grade rails in view of 25T axle load operation. Domestic manufacturers, having imported and installed the infrastructure for this, must graduate towards manufacturing these rails at the earliest.

3. 80 to 90% of above rails are required in 260m long panels and remaining in 13m/26m lengths as per field requirement.

4. It is requested that the matter of rail requirement of Indian Railways may be taken up with various domestic manufacturers on priority so that track safety works and capacity enhancement works of IR do not suffer.

With best regards,

Yours sincerely,

(B.P. Awasthi)

Shri Binoy Kumar,
Secretary,
Ministry of Steel,
Udyog Bhavan,
New Delhi.
